

## THREE-PHASE GENERATORS - 2 and 4 Poles

### DC GENERATORS

24 / 48 Vdc - with AVR - from 100 to 400A

A complete set of DC generators suitable for:

- Battery charges
- Low voltage lighting towers
- APU applications

Technical characteristics
Digital AVR
High voltage stability during a large speed range
Insulation class H
DC constant voltage
Low ripple
Built-in rectifier bridges
IP23
Efficiency: from 79 to 84 (depending on the model)

<b>Speed:</b>	fixed (2P 3000rpm - 4P 1500-1800-2400rpm) or variable (pre-defined range)
	2P: (2700 - 3900 rpm)
	4P: (1400 - 2400 rpm)
<b>Nominal voltage:</b>	24Vdc or 48Vdc
<b>Operating output voltage:</b>	22 to 30Vdc or 44 to 60Vdc (adjustable)
<b>Voltage accuracy:</b>	+ - 1%
